About the Fund

The Pendal Global Emerging Markets Opportunities Fund (**Fund**) is an actively managed portfolio of global emerging market shares.

Investment Return Objective

The Fund aims to provide a return (before fees, costs and taxes) that exceeds the MSCI Emerging Markets (Standard) Index (Net Dividends) in AUD over the long term. The suggested investment time frame is seven years or more.

Description of Fund

This Fund is designed for investors who want the potential for long-term capital growth, diversification across a broad range of global emerging market shares and are prepared to accept high variability of returns. The Fund can invest in shares in a range of emerging markets and may also hold cash.

As manager of the Fund, J O Hambro Capital Management (**JOHCM**) investment process for global emerging market shares aims to add value through a combination of country allocation as well as individual stock selection. JOHCM's country allocation process is based on analysis of a country's economic growth, monetary policy, market liquidity, currency, governance/politics and equity market valuation. The stock selection process focuses on buying quality growth stocks at attractive valuations.

The Fund has assets that are denominated in foreign currencies. This means that changes to the Australian dollar relative to foreign currencies may affect the value of the assets of the Fund. The Fund's foreign currency exposure will generally not be hedged to the Australian dollar but JOHCM may do so from time to time. JOHCM does not intend to use currency trading as an additional source of Fund returns.

Derivatives may be used to reduce risk and can act as a hedge against adverse movements in a particular market and/or in the underlying assets. Derivatives can also be used to gain exposure to assets and markets.

Investment Manager

The portfolio is managed by J O Hambro Capital Management Limited, a wholly-owned subsidiary within the Pendal Group.

Risks

An investment in the Fund involves risk, including:

- **Market risk** - The risk associated with factors that can influence the direction and volatility of an overall market, as opposed to security-specific risks. These factors can affect one country or a number of countries.
- **Security specific risk** - The risk associated with an individual asset.
- **International investments risk** – The risk arising from political and economic uncertainties, interest rate movements and differences in regulatory supervision associated with international investments.
- **Currency risk** - Currency exchange rate fluctuation risk arising from investing across multiple countries.
- **Regulatory risk** - The risk that a change in laws and regulations governing an investment or financial markets could have an adverse impact on an investment.

Please read the Fund's Product Disclosure Statement (**PDS**) for a detailed explanation of each of these risks.

Fund manager's commentary

Emerging markets suffered a weak month in August as a re-escalation in trade tensions and an inversion of the 2s10s spread (the difference between the two-year and 10-year US Treasury yield) caused concern. Global recessionary fears took center stage amid the steep falls in global bond yields and investors piled into precious metals. The US dollar strengthened and the Chinese yuan, significantly, dropped below the 7.0/USD level.

The Fund outperformed the benchmark in August with country allocation calls, the bedrock of our process, driving outperformance. Top performers over the month include Barrick Gold, which benefited from rising gold prices and ENN Energy. There were no material laggards. We remain in a position where structural economic imbalances are driving global geopolitical tensions, and the potential exists both for an escalation of US-Chinese conflict, and also an extension of these stresses to other countries, both developed and emerging. Caution is warranted.

Performance figures are calculated in accordance with the Financial Services Council (**FSC**) standards. Where performance returns are quoted "Post fees" then this assumes reinvestment of distributions and is calculated using exit prices which take into account management costs but not tax you may pay as an investor. Where performance returns are quoted "Pre fees and tax", they exclude the effects of management costs and any taxes. Past performance is not a reliable indicator of future performance.

If market movements, cash flows or changes in the nature of an investment (e.g. a change in credit rating) cause the Fund to exceed any of the investment ranges or limits specified, this will be rectified by PFSL as soon as reasonably practicable after becoming aware of it. If PFSL does so, it will have no other obligations in relation to these circumstances. The procedures, investment ranges, benchmarks and limits specified are accurate as at the date of this factsheet and PFSL reserves the right to vary these from time to time.
