

## Pendal Dynamic Income Fund

ARSN: 622 750 734

## Factsheet

Bond, Income &  
Defensive Strategies

September 2019

### About the Fund

The Pendal Dynamic Income Fund (**Fund**) is an actively managed portfolio of fixed income securities, Australian and global credit indices and emerging market sovereign issuers.

### Investment Return Objective

The Fund aims to provide a return (before fees, costs and taxes) that exceeds the RBA Cash Rate by 2-3% p.a. over the medium term. The suggested investment timeframe is three years or more.

### Description of Fund

The Fund is designed for investors who seek income from a portfolio of fixed income securities across a range of market conditions and are prepared to accept some variability of returns.

The Fund is an actively managed portfolio that invests primarily in Australian issued investment grade corporate bonds<sup>#</sup>. The Fund may also invest in Australian and global credit indices and emerging market sovereign issuers to provide portfolio diversification and enhance returns when we believe market conditions are supportive. The Fund also has the ability to decrease its allocation to credit and invest in cash and interest rate duration strategies when we expect volatility to increase.

Pendal uses a combination of quantitative modelling and qualitative research to construct the Fund's portfolio.

The Fund's portfolio is constructed using the following three step approach:

1. Generate investment themes through quantitative models
2. Reaffirm investment themes with qualitative research
3. Asset Allocation

### Investment Team

Pendal's Bond, Income & Defensive team comprises thirteen dedicated investment professionals with both global and domestic experience, invested across Income, Composite, Pure Alpha, Global and Australian Government strategies. The team also draws on a wide range of knowledge resources including Pendal's other specialist investment teams: Equity and Multi-Asset.

The Fund is managed by Vimal Gor, Head of Bond, Income & Defensive Strategies who has more than 24 years industry experience and 9 years at Pendal.

### Other Information

Fund size (as at 30 Sep 2019)	\$55 million
Date of inception	December 2017
Minimum investment	\$25,000
Buy-sell spread <sup>1</sup>	0.14% (0.07%/0.07%)
Distribution frequency	Quarterly
APIR code	BTA8657AU

<sup>1</sup> The buy-sell spread represents transaction costs incurred whenever you invest or withdraw funds, and may vary from time to time without notice.

### Performance

(%)	Total Returns		Benchmark Return
	(post-fee)	(pre-fee)	
1 month	0.17	0.22	0.08
3 months	0.38	0.52	0.25
6 months	2.43	2.65	0.61
1 year (pa)	5.53	5.90	1.37
Since Inception (pa)	4.04	4.36	1.43

### Asset Allocation (as at 30 September 2019)

Australian Credit	82.6%
Emerging Market Credit	24.2%
Cash & other	-6.8%

Allocations may not add to 100% due to the use of derivatives to obtain credit exposure.

### Top 10 Issuer Exposure

ANZ Banking Group Limited	6.0%
Macquarie Bank Limited	5.5%
Westpac Banking Corp	4.7%
ConnectEast Finance Pty Ltd	4.3%
AusNet Services	3.9%
WSO Finance Pty Ltd	3.6%
Toronto-Dominion Bank	3.5%
Pacific National Finance	3.2%
National Australia Bank	3.1%
DBNGP Finance Co Pty Limited	3.1%

### Key Fund Metrics

Average Australian Credit Rating	A-
----------------------------------	----

### Portfolio Characteristics

Benchmark	RBA Cash rate
Liquidity	Daily

### Management Costs<sup>2</sup>

Issuer fee <sup>3</sup>	0.55% p.a.
-------------------------	------------

<sup>2</sup> You should refer to the latest Product Disclosure Statement for full details of fees and other costs you may be charged.

<sup>3</sup> This is the fee we charge for overseeing the operations of the Fund and managing the assets of the Fund. The Issuer fee is paid from the assets of the Fund and is reflected in the unit price of your investment.

## Risks

An investment in the Fund involves risk, including:

- **Market risk** - The risk associated with factors that can influence the direction and volatility of an overall market, as opposed to security-specific risks. These factors can affect one country or a number of countries.
- **Security specific risk** – The risk associated with an individual security.
- **International investments risk** – The risk arising from political and economic uncertainties, interest rate movements and differences in regulatory supervision associated with international investments.
- **Interest rate duration risk** - The risk associated with adverse changes in asset prices as a result of interest rate movements.
- **Credit risk** - The risk of an issuing entity defaulting on its obligation to pay interest/principal when due.
- **Emerging markets risk** – The risk of asset price volatility and higher currency, default and liquidity risk from investments in emerging markets
- **Liquidity risk** - The risk that an asset may not be converted to cash in a timely manner.
- **Derivatives risk** – The risks arising from use of derivatives to manage exposures to investment markets.
- **Counterparty risk** - The risk of another party to a transaction failing to meet its obligations.

Please read the Fund's Product Disclosure Statement (**PDS**) for a detailed explanation of each of these risks.

## Market review

Australian credit gave back some of its prior month's gains during September. This was tied to a global sell-off in rates. The climb in yields was related in part to more buoyant risk sentiment with investors less concerned over geopolitical factors through most of the month.

Turning to issuance, volumes were softer than the prior month at roughly A\$6.2bn. In financials, there were large deals from French banks SocGen and BPCE with A\$700m and A\$400m respectively. Meanwhile, Westpac was the only name among the big four to issue debt capital with a A\$600m deal. In the green bond space, ADB issued an A\$150m bond maturing in 2030.

The Australian iTraxx index (Series 31 contract) traded in a 8bp range finishing the month 4.5bps tighter to +58.5bps. The new Series 32 contract finished the month at +67bps. Physical credit spreads underperformed with the average spread moving out 2bps. The worst performing sector was supranationals which widened out 4bps, whilst the best performing sector was utilities that were unchanged. Semi-government bonds outperformed tightening 1bp to government bonds.

## Fund performance and activity

The Fund returned 0.22% (pre fees), which was an outperformance of 0.14% versus the benchmark. This brought the one year return to 5.90% (pre fees) and an active return of 4.53%.

The domestic credit component was roughly flat as a retracement higher in underlying yields offset accruals. Infrastructure and utilities, where the fund is overweight, outperformed relative to other areas of Australian credit. Part of the fund's duration exposure was hedged given the strong rally in global bonds for the year, this was a positive for performance.

The EM exposure was roughly flat for the month. Spreads tightened over the month as concerns over Argentina eased and broader risk sentiment improved. The interest rate hedge helped protect from the back-up in yields and contributed positively.

## Market outlook

Our overall credit view remains cautiously constructive. We are positive on corporate fundamentals, but are wary that appetite for credit has demonstrated varying sensitivity to geopolitical developments and the ongoing trade war.

From a bottom-up perspective, corporates in the US have demonstrated resilience with upside surprises to earnings growth in the Q1 and Q2 reporting seasons. Similarly, domestic fundamentals remain relatively healthy as issuers have not increased balance sheet leverage materially over the past several years. The major Australian banks also have stronger capital ratios than previous years, which should support domestic financial stability. Moreover the weight of the Royal Commission has finally been lifted from their shoulders. That said, recent results from the majors have revealed challenges as a result of the Commission as well as slowing mortgage growth.

From a macro standpoint, volatility has quickly spiked then evaporated over the past year. Elevated levels during 2018 (particularly December), subsided in January and were relatively subdued until the flare-up in August. This has been alongside shifting perspectives towards the trade war and central bank policy stance. While the more dovish tilt from central bankers is a significant positive, we are wary that attitudes towards these developments can shift quickly as the story evolves, particularly with geopolitical battles.

Of further consideration is the softening of domestic economic growth, where there is likely further risk to the downside as weak wage growth and the house price correction threaten to dampen consumption. That said, we note the small improvement in house prices recently, along with the tax refund should provide a measure of support. Overall, we continue to recommend a defensive approach with any overweights in operationally resilient sectors such as Utilities and Infrastructure that provide higher yield to index returns.

In emerging markets (EM), sentiment continues to grapple with support from speculation of central bank easing versus fears of a global growth slowdown. On the former, we expect further stimulus efforts from the influential hands of the Fed and ECB. This should put further pressure on underlying yields. However, EM spreads may remain vulnerable to short-term fluctuations from developments on the Sino-US trade front, with uncertainty extending to the potential spillover effects.

On Argentina, investor concerns arose from the surprise victory from a perceived market-unfriendly candidate in the country's primary elections. We note other South American countries faced similar worries over policy promises from Presidential candidates, including Brazil and Mexico in recent years. However, these faded over time as the promises did not eventuate into the actions feared. Ultimately, such country-specific concerns have not shown a tendency to spread more broadly across emerging markets as an asset class.

As such, our EM index exposure (that is diversified across a number of countries) will be maintained at roughly 25%. The backdrop for domestic credit and underlying yields also remains supportive and the fund's target weight to the area is 85%. Market volatility will be seen as a potential opportunity to increase the allocation towards that target at more attractive levels.

This factsheet has been prepared by Pental Fund Services Limited (**PFSL**) ABN 13 161 249 332, AFSL No 431426 and the information contained within is current as at the date of this factsheet. It is not to be published, or otherwise made available to any person other than the party to whom it is provided.

PFSL is the responsible entity and issuer of units in the Pental Dynamic Income Fund (**Fund**) ARSN: 622 750 734. A product disclosure statement (**PDS**) is available for the Fund and can be obtained by calling 1800 813 886 or visiting [www.pentalgroup.com](http://www.pentalgroup.com). You should obtain and consider the PDS before deciding whether to acquire, continue to hold or dispose of units in the Fund. An investment in the Fund is subject to investment risk, including possible delays in repayment of withdrawal proceeds and loss of income and principal invested.

This factsheet is for general information purposes only, should not be considered as a comprehensive statement on any matter and should not be relied upon as such. It has been prepared without taking into account any recipient's personal objectives, financial situation or needs. Because of this, recipients should, before acting on this information, consider its appropriateness having regard to their individual objectives, financial situation and needs. This information is not to be regarded as a securities recommendation.

The information in this factsheet may contain material provided by third parties, is given in good faith and has been derived from sources believed to be accurate as at its issue date. While such material is published with necessary permission, and while all reasonable care has been taken to ensure that the information in this factsheet is complete and correct, to the maximum extent permitted by law neither PFSL nor any company in the Pental group accepts any responsibility or liability for the accuracy or completeness of this information.

Performance figures are calculated in accordance with the Financial Services Council (**FSC**) standards. Where performance returns are quoted "Post fees" then this assumes reinvestment of distributions and is calculated using exit prices which take into account management costs but not tax you may pay as an investor. Where performance returns are quoted "Pre fees and tax", they exclude the effects of management costs and any taxes. Past performance is not a reliable indicator of future performance.

If market movements, cash flows or changes in the nature of an investment (e.g. a change in credit rating) cause the Fund to exceed any of the investment ranges or limits specified, this will be rectified by PFSL as soon as reasonably practicable after becoming aware of it. If PFSL does so, it will have no other obligations in relation to these circumstances. The procedures, investment ranges, benchmarks and limits specified are accurate as at the date of this factsheet and PFSL reserves the right to vary these from time to time.
