

### Pendal Focus Australian Share Fund

ARSN: 113 232 812

Equity Strategies

August 2020

#### About the Fund

The Pendal Focus Australian Share Fund (**Fund**) is an actively managed concentrated portfolio of Australian shares.

#### Investment Return Objective

The Fund aims to provide a return (before fees, costs and taxes), that significantly exceeds the S&P/ASX300 (TR) Index over the medium to long term. The suggested investment timeframe is five years or more.

#### Description of Fund

This Fund is designed for investors who want the potential for long term capital growth and tax effective income from a concentrated portfolio of primarily 15-30 Australian shares and are prepared to accept higher variability of returns. The Fund may also hold cash and may use derivatives.

Pendal's investment process for Australian shares is based on our core investment style and aims to add value through active stock selection and fundamental company research. Pendal's core investment style is to select stocks based on our assessment of their long term worth and ability to outperform the market, without being restricted by a growth or value bias. Our fundamental company research focuses on valuation, franchise, management quality and risk factors (both financial and non-financial risk).

Derivatives may be used to reduce risk and can act as a hedge against adverse movements in a particular market and/or in the underlying assets. Derivatives can also be used to gain exposure to assets and markets.

#### Fund Positioning

The Fund is designed to complement a conventional, core share portfolio by providing satellite exposure to selected Australian equities with the potential for performance enhancement.

#### Investment Team

Pendal's nineteen member Equity team is one of the largest in the Australian fund's management industry. The portfolio manager for the Fund is Crispin Murray, who has more than 28 years' industry experience. Crispin is also Head of Equity.

#### Other Information

Fund size (as at 31 Aug 2020)	\$775 million
Date of inception	April 2005
Minimum investment	\$25,000
Buy-sell spread <sup>1</sup>	
For the Fund's current buy-sell spread information, visit <a href="http://www.pendalgroup.com">www.pendalgroup.com</a>	
Distribution frequency	Half-yearly
APIR code	RFA0059AU

#### Investment Guidelines

Ex-ante tracking error	4.5% - 8.0%
Max absolute stock position	15%
Min/max sector position relative to index	+/- 15%
Min/Max BARRA style factors	+/- 0.5 SD
SIRA style factors	Within 1 SD
Maximum cash level	30%
Shorting	No
Borrowing	No

#### Performance

(%)	Total Returns		Benchmark Return
	(post-fee)	(pre-fee)	
1 month	4.23	4.29	3.05
3 months	4.46	4.45	6.19
FYTD	3.20	3.33	3.67
6 months	-2.26	-1.64	-4.14
1 year (pa)	-1.67	-0.67	-4.82
2 years (pa)	2.63	3.53	1.92
3 years (pa)	7.07	8.05	6.24
5 years (pa)	8.73	9.80	7.58

#### Sector Allocation (as at 31 August 2020)

Energy	5.4%
Materials	23.1%
Industrials	13.2%
Consumer Discretionary	5.9%
Consumer Staples	4.3%
Health Care	9.6%
Information Technology	5.0%
Telecommunication Services	7.4%
Financials ex Property Trusts	20.4%
Property Trusts	2.7%
Cash & other	3.1%

#### Top 10 Holdings (as at 31 August 2020)

BHP Billiton Limited	10.1%
CSL Limited	7.9%
Westpac Banking Corporation	5.7%
Commonwealth Bank of Australia Limited	5.2%
Xero Limited	4.5%
Telstra Corporation Limited	4.4%
Metcash Trading Limited	4.3%
Qantas Airways Limited	4.1%

ANZ Banking Group Limited	3.9%

#### Management Costs<sup>2</sup>

Issuer fee <sup>3</sup>	0.75% pa
Performance fee <sup>4</sup>	15% x the Fund's performance (before fees) in excess of the performance hurdle.

<sup>1</sup> The buy-sell spread represents transaction costs incurred whenever you invest or withdraw funds, and may vary from time to time without notice.

<sup>2</sup> You should refer to the latest Product Disclosure Statement for full details of fees and other costs you may be charged.

<sup>3</sup> This is the fee we charge for overseeing the operations of the Fund and managing the assets of the Fund. The Issuer fee is paid from the assets of the Fund and is reflected in the unit price of your investment.

<sup>4</sup> The Fund's performance fee is 15% of the Fund's performance in excess of the performance hurdle. The performance hurdle is the performance of the benchmark (S&P/ASX 300 (TR) Index) plus the issuer fee of 0.75% pa. If a performance fee is payable, it is charged in addition to the issuer fee. The fee is calculated each Business Day based on the investment performance and value of the Fund on that day. If we are entitled to a performance fee, it is paid to us as at 30 June each year.

## Risks

An investment in the Fund involves risk, including:

- **Market risk:** The risk that factors affecting one or more countries that can influence the direction and volatility of an overall market, as opposed to security-specific risks.
- **Security specific risk:** The risks associated with an individual security.
- **Concentrated portfolio risk** - The Fund's investment strategy of seeking to generate high returns by investing in a concentrated portfolio of Australian shares makes the Fund more volatile than a diversified Australian share fund.

Please read the Fund's Product Disclosure Statement (PDS) for a detailed explanation of each of these risks.

## Market review

The Australian equities market performed strongly during reporting season, with the S&P/ASX 300 Accumulation index adding +3.0%. Whilst Industrials (+3.6%) outperformed, Resources (+0.9%) were the laggard as gold miners (-8.3%) retreated from the recent highs.

The Victorian lockdown continues to drag on the national economic pulse. The state's decision to pursue an effective elimination strategy is material – it means stricter restrictions for longer, with a greater impact on activity, the economy and budget deficits - Australia is a negative outlier in terms of global trends in industrial survey improvement as a result. This remains a headwind for the domestic equity market and specific companies within it.

In terms of sector performance, Consumer Discretionary (+9.7%), Information Technology (+15.2%), Real Estate (+7.6%) and Health Care (+4.0%) were the largest contributors to the headline index; whereas IT was also the best performing sector by absolute return. In contrast, Communication Services (-3.8%), Utilities (-4.8%) and Consumer Staples (-0.3%) finished the month in the red. Index heavyweights Materials (+1.2%) and Financials (+1.3%) also underperformed the index in August.

Stocks which had been held for defensive qualities – but which did not live up to this billing were sold off. Examples included Telstra, APA Group and Transurban. Companies which are facing structural challenges such as low rates (eg Bendigo Bank, Challenger) or lower power prices (eg AGL Energy) also underperformed.

Few sectors saw material earnings upgrades. Miners saw the largest ones, but had already done well and tended to lag in August. The largest downgrades were in telcos – which underperformed – but other sectors such as media, gaming and materials saw downgrades, but still outperformed.

Essentially, there are two widely divergent views on the broader equity market from this point. The bear case is that equity markets are overvalued and due for a prolonged correction driven by a combination of excess government debt, the ultimately deflationary effects of quantitative easing and the economic damage of risk aversion, bankruptcies and structural employment.

The bull case, in contrast, is that we are at the start of a cyclical recovery where sustained expansionary policies and significant surplus capacity, combined with a wave of pent up demand – potentially super charged by the advent of a vaccine – and a lengthy period of low rates continue to boost the equity market. In this vein, it is also important to note that the Australian equity market has lagged global indices – partly driven by a smaller exposure to technology stocks – and has reached nowhere near the same degree of relative valuations.

Uncertainty remains high. As well as questions over the pace of recovery, we must also contend with the run up to the US Presidential election and heightened tensions with China.

We note that the key factors in supporting equity markets – abundant liquidity, low interest rates, and a better than expected pace of economic recovery, remain in place. However, it is not the time to make a heroic call on the outcome. Our approach is to focus on stocks and invest where we can find limited relative downside risk, at the same time as building a balanced portfolio

which has some protection against a material deterioration in conditions.

Reporting season highlighted the sometimes extreme divergence we are seeing between industries and between companies driven by a combination of cyclical and structural shifts behaviour and demand. This is proving to be constructive environment for active management.

## Fund performance

The Fund outperformed its benchmark over the month of August.

## Contributors

### Overweight Qantas (QAN, +22.0%)

There was no much new information in the Qantas result, but it did provide some more detail about the rate of cash burn. A material proportion relates to shift in working capital – which should reverse as conditions normalise - while restructuring charges should also yield medium term benefits. The rate of cash burn from the operational business – particularly in the dormant international division – was better than the market expected.

### Overweight Nine Entertainment (NEC, +22.5%)

The market's initial reaction to NEC's results was negative given a worse than expected update for TV ad numbers in July. However, signs of improvement are coming through, while the result delivered good cash flow. Potential structural improvements in revenue – from Stan subscriptions and social media payments – coupled with cost out, place NEC in a good spot when the cycle improves.

## Detractors

### Overweight Telstra Corporation Limited (TLS, -11.4%)

Telstra hit its FY20 numbers, but gave a disappointing outlook. There are two issues; first, the losses associated with the rump of its fixed line business, which the market expected to hit in FY22, are now likely to come through earlier, leading to a downgrade in FY21. Second, and more importantly, management have cut the return on capital target for FY23 from 10% to 7%. While consensus had not factored in a 10% return, this shift is seen as a signal that the environment is going to be tougher than management has previously indicated. We think the dividend is unlikely to be cut – and the degree of yield in the current environment should see the stock remain supported. However it also may mean that the implied upside case is now smaller.

### Does not hold Afterpay Limited (APT, +33.4%)

Afterpay continued its relentless re-rating, driven most recently by the acquisition of small European and Asian businesses which are being factored into a material uplift in "total addressable market (TAM)". The result itself was mixed: gross margin was good but there were some signs of momentum slowing in US - this could be a significant issue in next 3 months. We continue to prefer Xero as our growth exposure.

## Strategy and outlook

The net result of earnings season is that earnings were down -38% for the second half of FY20 and -16% for the full year. Dividends fell 30% as companies took a prudent stance on capital management.

This was a worse result than the GFC, where earnings fell -20% in the second half of FY09. Nevertheless, the market continued to rally through August as investors proved willing to look through the near term impact of Covid-19. Instead, the focus was on how management are going about adapting to the new environment.

We saw strong performance from companies which have benefited from stimulus and which met already high expectations – such as JB Hi-Fi, James Hardie and Afterpay. However there was also some relief rallies in stocks which have been hit heavily, but where there is a sense that the worst may be over, including Nine Entertainment, Qantas, the REITs and Coca Cola Amatil.

Stocks which had been held for defensive qualities – but which did not live up to this billing were sold off. Examples included Telstra, APA Group and Transurban. Companies which are facing

structural challenges such as low rates (eg Bendigo Bank, Challenger) or lower power prices (eg AGL Energy) also underperformed.

Few sectors saw material earnings upgrades. Miners saw the largest ones, but had already done well and tended to lag in August. The largest downgrades were in telcos – which underperformed – but other sectors such as media, gaming and materials saw downgrades, but still outperformed.

Performance figures are calculated in accordance with the Financial Services Council (FSC) standards. Where performance returns are quoted "Post fees" then this assumes reinvestment of distributions and is calculated using exit prices which take into account management costs but not tax you may pay as an investor. Where performance returns are quoted "Pre fees and tax", they exclude the effects of management costs and any taxes. Past performance is not a reliable indicator of future performance.

If market movements, cash flows or changes in the nature of an investment (e.g. a change in credit rating) cause the Fund to exceed any of the investment ranges or limits specified, this will be rectified by PFSL as soon as reasonably practicable after becoming aware of it. If PFSL does so, it will have no other obligations in relation to these circumstances. The procedures, investment ranges, benchmarks and limits specified are accurate as at the date of this factsheet and PFSL reserves the right to vary these from time to time.
