About the Fund

The Pendal Sustainable Australian Fixed Interest Fund (**Fund**) is an actively managed portfolio of Australian fixed interest securities. Investments are selected based on a range of sustainable, ethical and financial criteria.

Investment Return Objective

The Fund aims to provide a return (before fees, costs and taxes) that exceeds the Bloomberg AusBond Composite 0+ Yr Index by 0.75% p.a. over rolling 3 year periods.

Description of Fund

The Fund offers investors access to a diversified portfolio of fixed interest securities and seeks exposure to issuers that demonstrate leading environmental, social and corporate governance (ESG) and ethical practices while avoiding exposure to issuers with activities that we consider to negatively impact the environment or society.

The Fund will not invest in issuers directly involved in either of the following activities:

- tobacco production; or
- controversial weapons manufacture (such as cluster munitions, landmines, biological or chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments).

The Fund will also not invest in issuers directly involved in any of the following activities, where such activities account for 10% or more of an issuer's total revenue:

- the production of alcohol;
- manufacture or provision of gaming facilities;
- manufacture of non-controversial weapons or armaments;
- manufacture or distribution of pornography;
- direct mining of uranium for the purpose of weapons manufacturing; or
- extraction of thermal coal and oil sands production.

The Fund uses a security selection process that combines sustainable and ethical criteria with Pendal's credit analysis. Pendal's investment process for fixed interest aims to add value through multiple strategies and investment research. Pendal seeks to generate excess returns through strategies including active security (including Green, Social and Sustainable Bonds) and sector selection, duration, yield curve and credit management.

We believe our strategy is unique in the Australian marketplace due to our top down process which combines a large number of quantitative models, our qualitative overlay and technical analysis giving us a greater understanding of global forces that affect the domestic market and the opportunities it presents. This is a more robust process than focussing primarily on domestic economic factors when evaluating the opportunity set.

Our investment approach for credit management seeks to identify opportunities on a sector, issuer and security basis by incorporating top-down and bottom-up research. Top-down research includes analysis of economic and market data, along with macro credit fundamentals such as company earnings, balance sheet health, default rates and equity volatility. The bottom up research includes analysis of earnings and cashflow volatility, balance sheet, business diversity, industry and valuation.

Investment Team

Pendal's Bond, Income & Defensive team includes fifteen dedicated investment professionals. The team also draws on a wide range of knowledge resources including Pendal's other specialist investment teams: Equity Strategies and Multi-Asset Strategies. The co-portfolio managers of the Fund are George Bishay and Tim Hext, who have a combined 60 years of industry experience.
