About the Fund

The Pendal Active Moderate Fund (**Fund**) is an actively managed diversified portfolio that invests in Australian and international shares, Australian and international listed property securities, Australian and international fixed interest, cash and alternative investments. The Fund has a similar weighting towards defensive assets as it does towards growth assets.

Investment Return Objective

The Fund aims to provide a return (before fees, costs and taxes) that exceeds the Fund's benchmark over the medium to long term. The suggested investment timeframe is five years or more.

Benchmark

The benchmark for the Fund is created from a range of published indices. The benchmark is based on the asset allocation neutral position and the index returns for each asset class. Details of the particular market indices used for the Fund's benchmark can be found at www.pendalgroup.com/Pendal-Active-Moderate-Fund

Investment Process

At Pendal, we actively manage our portfolios to meet their investment objectives by diversifying investments across both asset classes *and* strategies. We employ three main approaches to do this:

1. **Strategic asset allocation** – weighted asset class exposures designed to meet the investment objectives over the long term investment horizon
2. **Active management** – exploitation of market inefficiencies within asset classes
3. **Active asset allocation** – exploitation of market directionality across asset classes

The underlying investments in the Fund are managed by Pendal together with a number of external partners. Pendal manages investments in the asset classes of Australian shares, Australian fixed interest and cash, global fixed interest, Australian property securities and alternative investments. These investments are augmented by our arrangements with leading global investment managers who have a competitive advantage in the management of global asset classes.

The Pendal Multi-Asset team also manages an active asset allocation process designed to increase portfolio returns within a defined risk budget.
