December 2021

#### About the Fund

The Pendal Focus Australian Share Fund (**Fund**) is an actively managed concentrated portfolio of Australian shares.

#### Investment Return Objective

The Fund aims to provide a return (before fees, costs and taxes), that significantly exceeds the S&P/ASX300 (TR) Index over the medium to long term. The suggested investment timeframe is five years or more.

#### Description of Fund

This Fund is designed for investors who want the potential for long term capital growth and tax effective income from a concentrated portfolio of primarily 15-30 Australian shares and are prepared to accept higher variability of returns. The Fund may also hold cash and may use derivatives.

Pendal's investment process for Australian shares is based on our core investment style and aims to add value through active stock selection and fundamental company research. Pendal's core investment style is to select stocks based on our assessment of their long term worth and ability to outperform the market, without being restricted by a growth or value bias. Our fundamental company research focuses on valuation, franchise, management quality and risk factors (both financial and non-financial risk).

Derivatives may be used to reduce risk and can act as a hedge against adverse movements in a particular market and/or in the underlying assets. Derivatives can also be used to gain exposure to assets and markets.

#### Fund Positioning

The Fund is designed to complement a conventional, core share portfolio by providing satellite exposure to selected Australian equities with the potential for performance enhancement.

#### Investment Team

Pendal's eighteen member Equity team is one of the largest in the Australian fund's management industry. The portfolio manager for the Fund is Crispin Murray, who has more than 31 years' industry experience. Crispin is also Head of Equity.

## Risks

An investment in the Fund involves risk, including:

- **Market risk:** The risk that factors affecting one or more countries that can influence the direction and volatility of an overall market, as opposed to security-specific risks.
- **Security specific risk:** The risks associated with an individual security.
- **Concentrated portfolio risk** - The Fund's investment strategy of seeking to generate high returns by investing in a concentrated portfolio of Australian shares makes the Fund more volatile than a diversified Australian share fund.

Please read the Fund's Product Disclosure Statement (**PDS**) for a detailed explanation of each of these risks.

Performance figures are calculated in accordance with the Financial Services Council (FSC) standards. Where performance returns are quoted "Post fees" then this assumes reinvestment of distributions and is calculated using exit prices which take into account management costs but not tax you may pay as an investor. Where performance returns are quoted "Pre fees and tax", they exclude the effects of management costs and any taxes. Past performance is not a reliable indicator of future performance.

If PFSL does so, it will have no other obligations in relation to these circumstances. The procedures, investment ranges, benchmarks and limits specified are accurate as at the date of this factsheet and PFSL reserves the right to vary these from time to time.
