## Factsheet

Global Equities  
January 2022

### About the Fund

The Pendal Global Select Fund (**Fund**) is an actively managed portfolio of global shares.

### Investment Return Objective

The Fund aims to provide a return (before fees, costs and taxes) that exceeds the MSCI ACWI NR Index (net dividends reinvested) in AUD over rolling 5 year periods. The suggested investment timeframe is five years or more.

### Description of Fund

The Fund is designed for investors who want the potential for long-term capital growth from a concentrated portfolio of listed global equities, with an investment timeframe of 5 years or greater and are prepared to accept higher variability of returns.

The Fund's strategy is based on a belief that stock markets are inefficient and aim to exploit market anomalies via an investment process that combines both top-down and bottom-up research. As investment manager, JOHCM's distinct '4-Dimensional' investment process (stocks, sectors, countries, time/change) focuses on the behaviour of each share price to determine whether the most important driver of each prospective investment is stock specific, sector or country-based.

The Fund will typically hold 30-60 stocks and is benchmark agnostic.

The investment manager recognises that ESG factors can create risks and opportunities for companies and as such incorporates ESG risks into their analytical framework and portfolio construction. Further, the Fund employs exclusionary screens to avoid investments in companies that cause significant social and/or environmental harm.

The Fund will not invest in companies directly involved in either of the following activities:

- tobacco production (including e-cigarettes and inhalers); or
- controversial weapons manufacture (such as cluster munitions, landmines, biological or chemical weapons, nuclear weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments).

The Fund will also not invest in companies which derive 10% or more of their total revenue directly from any of the following activities:

- extraction, exploration, distribution, or refinement of fossil fuels, or fossil fuel-based power generation\*;
- production of alcoholic beverages;
- manufacture, ownership or operation of gambling facilities, gaming services or other forms of wagering;
- manufacture of non-controversial weapons or armaments;
- manufacture or distribution of pornography; and
- uranium mining for the purpose of nuclear power generation.

### Investment Team

The strategy is managed by Christopher Lees Senior Fund Manager and Nudgem Richyal, both Senior Fund Managers at JOHCM since joining in 2008. Chris has 31 years of industry experience and Nudgem has 21 years of industry experience. Prior to joining JOHCM, Chris and Nudgem worked together at Baring Asset Management. They have employed their current approach to investing in global equities since 2004. The team leverages the full breadth of JOHCM's 40+ portfolio managers and analysts as part of the investment process.

## Risks

An investment in the Fund involves risk, including:

- **Market risk** - The risk associated with factors that can influence the direction and volatility of an overall market, as opposed to security-specific risks. These factors can affect one country or a number of countries.
- **Security specific risk** - The risk associated with an individual asset.
- **International investments risk** – The risk arising from political and economic uncertainties, interest rate movements and differences in regulatory supervision associated with international investments.
- **Currency risk** - Currency exchange rate fluctuation risk arising from investing across multiple countries.
- **Concentrated portfolio risk** – The Fund's investment strategy of seeking to generate high returns by investing in a concentrated portfolio of global shares may make the Fund more volatile than a diversified global share fund with a larger number of shares. This means there is a greater risk of negative returns, particularly over the short to medium term.
- **Emerging markets risk** – The risk of asset price volatility and higher currency, default and liquidity risk from investments in emerging markets.
- **Derivatives risk** – The risks arising from use of derivatives to manage exposures to investment markets.
- **Class risk** - The Fund has been established as a separate class of units in the Scheme. As the assets are held on trust for all investors, there is a risk that investors of one class, may be exposed to liabilities of another class of units and they could lose some or all of their investment in the Fund. There is also a risk that in the event of an insolvency, the assets of the Fund could be made available to creditors of another class of units of the Scheme.

Please read the Fund's Product Disclosure Statement (PDS) for a detailed explanation of each of these risks.
